Option 1: Screening Assessment – Presence Absence Total Coliform. E. coli, pH, conductivity, nitrate, nitrite, total dissolved solids, turbidity, iron, and manganese - **\$ 80.00 per sample**

Option 2: Informational Water Testing: Presence/ Absence Test for T. Coliform/ E. coli and Alkalinity (Total as CaCO<sub>3</sub>), Chloride, Fluoride, Hardness, Nitrate as N, Orthophosphate, pH, Sulfate, Total Dissolved Solids, Turbidity, Metals including: Aluminum, Arsenic, Barium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Nickel, Potassium, Sodium, Zinc, and more. **\$ 140.00 per sample.**

### Check payable to: Keystone Clean Water Team

#### Instructions

1. Fill Out the Form.
2. Remove the aeration device on your kitchen sink and allow the water to run for 15 minutes.
3. Collect the water samples on the morning of July 10, 2021- The sampling kit has two containers one for water quality and one for bacterial screen. Reduce the water flow from the sink to a steady stream and fill the bottles to the top. Please fill one bottle at a time. After collection, store the samples in the refrigerator.
4. Bring the sample to the Township Building Packed on Ice on July 10, 2021- between 10:00 am and Noon.
